EXECUTIVE SUMMARY

Letters of notification of EGF eligibility were issued to 8,779 EGF eligible construction workers and apprentices on the 19th December 2011. That date also saw the launch of a website (www.egf.ie) to provide additional information to workers and apprentices provided with postal notification of their eligibility for EGF supports. The EGF Construction Contact Centre commenced operations on the 19th December 2011.

Between the 19th December 2011 and 27th January 2012 (i.e., the reference period for this report) the total number of visits to www.egf.ie was 2,617. Excluding repeat visits the number of unique visits is 1,647. The majority (i.e., 1,577) of unique visits originated in Ireland. Over the reporting period, 131 persons submitted online applications for EGF Training Grants.

A total of 452 individuals from the cohort of persons notified of their EGF eligibility accessed the services of the EGF Construction Contact Centre between the 19th December 2011 and the 27th January 2012. This figure corresponds to 5.1% of the 8,779 persons issued letters of notification of EGF eligibility on the 19th December 2011. The main reasons eligible individuals sought assistance from the EGF Construction Contact Centre were to access EGF Training Grants (175 corresponding to 38.7%), to make a general enquiry (145 corresponding to 32.1%), or to access guidance courses being provided by local Vocational Education Committees (86 corresponding to 19.0%).

In overall terms, a total of 239 specific interventions were made on behalf of EGF eligible individuals during the reference period for this report. In the majority (76.6%) of cases each individual received just one intervention. The main specific interventions provided included referring clients to guidance courses being provided by local Vocational Education Committees (108), processing EGF Training Grant Applications and Reimbursement Forms (99), and referring clients to specific Higher Education Authority funded institutions (22). In a small number of instances clients were referred to FÁS (7) or the County and City Enterprise Boards (3).

During the period between the 19th December 2011 and 27th January 2012 a total of 99 completed applications were received in respect of EGF Training Grants (83) and Reimbursement of Fees Paid (16). With one exception, all of the completed EGF Training Grant Applications were for FETAC approved courses. Forty five of all 99 completed applications were approved on or before the 27th January 2012 with the remaining 54 awaiting decision.

Data on the status of the 452 EGF eligible individuals that accessed the services of the EGF Construction Contact Centre show that, on the 27th January 2012, 275 (corresponding to 60.1% of EGF eligible persons contacting the EGF Construction Contact Centre) had accessed (38) or were accessing (237) specific interventions. Many of the individuals in the latter category are expected to commence specific interventions in February 2012.

1 INTRODUCTION

In June 2010, the EGF Managing Authority submitted an application, which was subsequently revised into three separate NACE 2 applications in February 2011, in respect of workers and apprentices made redundant in the construction sector. The applications sought support for 9,089 construction workers and apprentices made redundant between 1st July 2009 and 31st March 2010 in the following sectors:

- construction of buildings - NACE 41;
- specialised construction services - NACE 43; and,
- architectural and engineering services - NACE 71.

The EGF eligible redundant construction workers and apprentices were identified based on evidence of statutory redundancy payments (RP50) and on data from the apprenticeship database held by FÁS, respectively.

A range of supports were outlined in the three applications which were approved by the EU authorities on the 14th November 2011. They include:

- career guidance supports;
- training supports delivered by FÁS, including both on and off the job apprenticeship supports to allow redundant apprentices to progress their apprenticeships;
- providing EGF Training Grants where a particular training or education measure cannot be delivered by a public institution but can be through the private sector;
- further education and higher education supports delivered by the VECs and HEA funded institutions, respectively; and,
- enterprise and self-employment advice and guidance supports delivered by the County and City Enterprise Boards.

The three programmes will run until the 9th June 2012.

1.1 The Cohort of EGF Eligible Workers and Apprentices Receiving Letters of Notification of EGF Eligibility

An analysis of data concerning the 9,089 redundant construction workers and apprentices covered by the three EGF construction applications was undertaken in November 2011. The results of the analysis identified a number of duplicate entries and the cohort of EGF eligible construction workers and apprentices was revised to 8,925. A subsequent control identified one further ineligible person bringing the EGF eligible cohort to 8,924. Of that number, 8,779 EGF eligible clients were identified as having a home address in this jurisdiction and letters of notification of eligibility for EGF services were issued on the 19th December 2011 to all of these persons.

Table 1 shows the breakdown of the eligible cohort by NACE 2 sector. Just over half (53.9%) of the eligible cohort is covered by the NACE 41 programme. This programme is targeted at workers and apprentices previously employed by companies involved in the construction of residential and non-residential buildings. Just over one third (36.8%) of the cohort is covered by the NACE 43 programme. This programme is targeted at workers and apprentices previously employed in companies providing a range of trades allied to construction (e.g., plastering, carpentry, painting, roofing etc.). The third programme (i.e., NACE 71) accounts for 9.3% of the eligible cohort and is targeted at workers previously employed in companies providing architectural and engineering services.

Table 1.1
EGF Eligible Construction Workers and Apprentices by NACE 2 Sector

	NACE 41	NACE 43	NACE 71	Total
Redundant Workers	4,060	1,648	816	6,522
Redundant Apprentices	669	1,588	0	2,257
Total	4,429	3,234	816	8,779
%	59.3	36.8	9.3	100.0

The distribution of the eligible cohort by county of residence is presented in Annex 1. It shows that almost one quarter (23.4%) of the eligible cohort resided in Dublin with a further 14.1% residing in Cork. Other large clusters of eligible workers and apprentices are found in counties bordering Dublin (notably Meath and Kildare). Smaller numbers are distributed across the remaining 22 counties.

1.2 Informing the Cohort of EGF Eligible Workers

As noted above, letters of notification of EGF eligibility were issued to 8,779 persons on the 19th December 2011. That date also saw the launch of a website (www.egf.ie) to provide additional information to redundant workers and apprentices provided with postal notification of their eligibility for EGF support. The EGF Construction Contact Centre commenced operations on the 19th December 2011. It provides advice and information to construction workers and apprentices notified of their eligibility for EGF support. It also processes applications for EGF Training Grants and Reimbursement of Fees Paid.

1.3 Scope and Purpose of Report

This report covers the implementation of the three EGF construction programmes during the period from the 19th December 2011 to the 27th January 2012. The purpose of the report is to provide the EGF Managing Authority with data relevant to monitoring the implementation of the three EGF construction programmes. In that regard, this report identifies the uptake of supports provided for the eligible cohort and reports on a number of performance indicators, particularly the status of recipients of services at the end of January 2012.

2 AGGREGATE INDICATORS FOR UPTAKE AND DELIVERY OF SERVICES

This section presents data on website visits and the number of eligible workers and apprentices contacting the EGF Construction Contact Centre during the reporting period.

2.1 Website Statistics for www.egf.ie

During the period between the 19th December 2011 and 27th January 2012 the total number of visits to www.egf.ie was 2,617. Excluding repeat visits the number of unique visits is 1,647. On average, each visit to the site lasted just under seven minutes. The majority (i.e., 1,577) of unique visits originated in Ireland. Annex 2 presents a breakdown of unique visits by county.

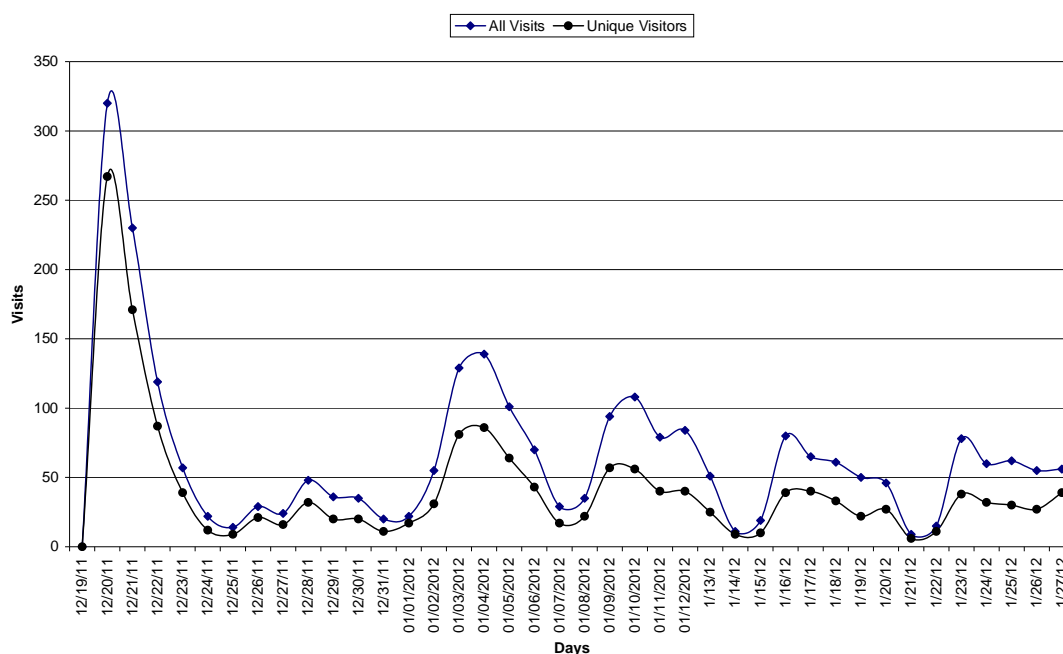

Figure 2.1 Website Visits 19-12-2011 to 27-01-2012

**Table 2.1
EGF Online Applications Submitted by Programme**

	Number	%
NACE 41	72	55.0
NACE 43	39	29.8
NACE 71	20	15.3
Total	131	100.0

Figure 2.1 shows that the number of visits to the website peaked in the days following its launch and has declined on a weekly basis since then. The number of new unique new visits over the last working week of January 2012 is 166.

Over the reporting period a total of 131 eligible persons submitted online applications for EGF Training Grants (see Table 2.1). The proportions of eligible persons from each construction programme submitting online applications are broadly consistent with the distribution of the eligible cohort in each programme, with some over-representation from the NACE 71 programme.

2.2 Number of Eligible Workers and Apprentices Accessing Services Provided by the EGF Construction Contact Centre

A total of 452 individuals from among the cohort of persons informed of their EGF eligibility accessed the services of the EGF Construction Contact Centre on or before the 27th January 2012 (see Table 2.2). This figure corresponds to 5.1% of the eligible cohort. In broad terms, the proportion of eligible individuals from each construction programme accessing the services of the EGF Construction Contact Centre is consistent with the distribution of the eligible cohort in each programme (as in Table 1.1). Annex 3 presents a breakdown of the 452 individuals by county of residence.

Table 2.2
Eligible Construction Workers and Apprentices Accessing Services of the EGF Construction Contact Centre by NACE 2 Sector

	NACE 41	NACE 43	NACE 71	Total
Redundant Workers	231	83	52	366
Redundant Apprentices	19	67		86
Total	250	150	52	452
% Accessing Services	55.3	33.2	11.5	100.0
% of Eligible Cohort	5.6	4.6	6.4	5.1

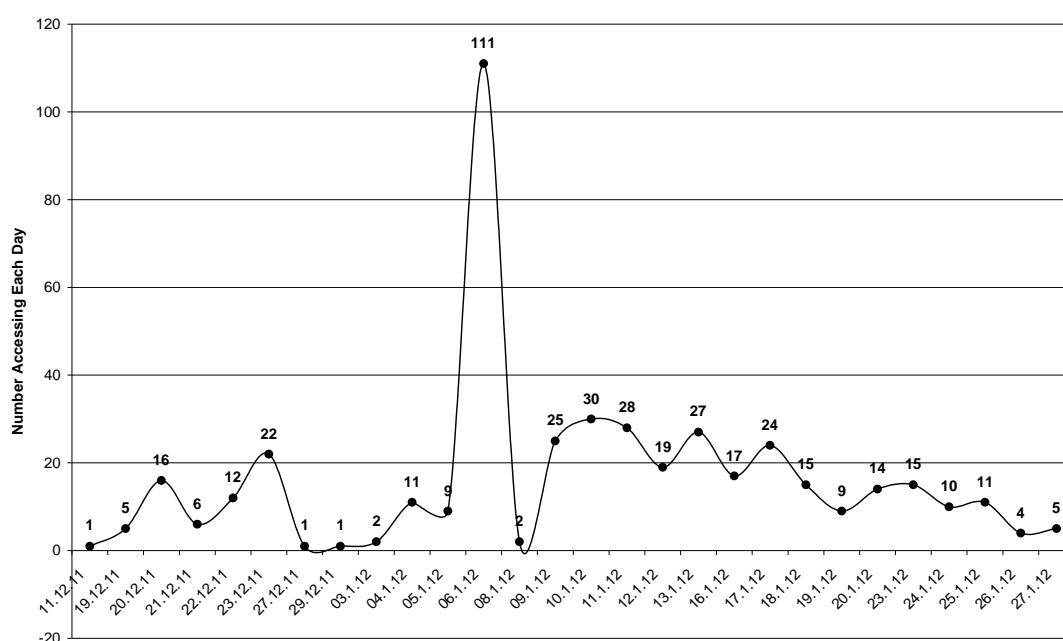

Figure 2.2 Number of Unique Eligible Individuals Accessing the Services of EGF Construction Contact Centre on Daily Basis (19-12-2011 to 27-01-2012)

Between the 19th December and the end of December 2011, 64 EGF eligible persons accessed the services of the EGF Construction Contact Centre. The number of eligible individuals contacting the EGF Construction Contact Centre peaked at 111 on the 6th January 2012 (see Figure 2.2). Since then the number of new enquiries from EGF eligible individuals has declined on a weekly basis with the trend being broadly similar to that observed in the case of website visits (see Figure 2.1). During the week ending 27th January 2012 a total of 45 new eligible individuals accessed the services of the EGF Construction Contact Centre.

Table 2.3
Main Purpose of Initial Enquiry to Construction Contact Centre

	Number	%
EGF Training Grant	175	38.7
General Enquiry	145	32.1
VEC Guidance	86	19.0
Multiple Issues Including EGF Training Grant Retrospective	26	5.7
EGF Training Grant Retrospective	12	2.7
Higher Education (HEA)	5	1.1
FAS Training	3	0.7
Total	452	100.0

All calls to the EGF Construction Contact Centre are logged and the purpose of each initial call is noted. Examination of the reasons for first contact shows that the single largest category of calls made to the EGF Construction Contact Centre by EGF eligible individuals concerned EGF Training Grants¹ (see Table 2.3). At 175, the number of individuals actually making enquiries regarding these grants is somewhat higher than the corresponding number that submitted an online EGF Training Grant Application (i.e., 131) and, as is shown below, the number of completed EGF Training Grants Applications received by the EGF Construction Contact Centre (i.e., 83). Among the reasons for the different figures is the requirement for additional documentation to be provided to the EGF Construction Contact Centre to complete the application process and move applications forward for decision.

From the more detailed breakdown of initial enquiries presented in Annex 4, there is evidence that, in proportionate terms, enquiries concerning EGF Training Grants were

¹ EGF Training Grants pay fees for approved courses in private education and training companies. Approved courses lead to recognised qualifications that are relevant to pursuing employment in sectors where there are reasonable chances of getting a job or evidence of skills shortages. In general, there are two types of approved courses: courses recognised and accredited by the Further Education and Training Awards Council (FETAC); and, courses recognised and accredited by the Higher Education and Training Awards Council (HETAC). The maximum EGF Training Grant in the case of courses accredited by FETAC is €3,000. In the case courses accredited by HETAC the maximum grant is €5,000. In all cases the grant is made payable to the institute, college, or company providing the training course.

more likely to be initiated by eligible individuals included under the NACE 71 programme and also by apprentices.

Numbering 145 individuals, the second largest category of enquiries were general enquiries regarding the EGF and related matters arising from the receipt of the postal notification of eligibility subsequent to the 19th December 2011. Many of the individuals making these enquiries sought clarification regarding what was available but did not wish to pursue any of the specific interventions being provided. As is shown below, the majority of individuals making general enquires did not progress to taking up interventions funded by the EGF.

Almost one in five (86) of eligible individuals calling the EGF Construction Contact Centre were interested in receiving information on guidance courses being provided by their local VEC or being referred for access to a guidance course.² All persons actually interested in pursuing a guidance course are referred by the EGF Construction Contact Centre to a Co-ordinator acting on behalf of local VECs who then case manages the contact between referred individuals and the relevant local VEC.

The other initial enquiries were made by small numbers of individuals and concerned reimbursement of course fees paid, multiple issues covered by the enquiry, access to higher education options, and access to FÁS training.

3 SPECIFIC INTERVENTIONS PROVIDED TO EGF ELIGIBLE WORKERS AND APPRENTICES

The EGF Construction Contact Centre was established to provide support to construction workers and apprentices notified of their eligibility for EGF support under the three construction applications on the 19th December 2011. In addition to dealing with queries from EGF ineligible persons and the general public, it provides:

- phone and on-line information, advice, and support;
- access to professional services in the areas of career and occupational guidance; and,
- referrals to other service providers.

It also processes applications for EGF Training Grants and for Reimbursement of Fees Paid.

² With EGF support Vocational Educational Committees (VEC) are offering a career planning course. The course is designed to develop career management skills. It covers topics such as the changing nature of work and assists participants to identify the skills needed to manage their career and improve their employment prospects. The course also provides practical guidance in job searching and preparing a CV. Participants receive three hours of one-to-one guidance.

The specific services of the EGF Construction Contact Centre can only be accessed by persons possessing an EGF Eligibility Number provided to them by the EGF Managing Authority in their postal notification of EGF eligibility.

In overall terms, a total of 239 specific interventions were made on behalf of EGF eligible individuals during the reference period for this report (see Table 3.1). In the majority (76.6%) of cases each individual received just one intervention.

Table 3.1
Main Actions Taken by EGF Construction Contact Centre in Respect of Eligible Persons Accessing its Services

	Number	%
Referred to VEC for Guidance	108	23.9
Processing of EGF Training Grant & Reimbursement Applications	99	21.9
Referred to Third Level Institution	22	4.9
Referred for FÁS Training	7	1.5
Referred to County & City Enterprise Board	3	0.2
Total Interventions	239	NA

Table 3.1 shows that the main specific interventions provided include referring clients to VEC guidance provision (including notifying the VEC Co-ordinator of referral), processing EGF Training Grant Applications and Applications for Reimbursement of Fees Paid, and referring clients to specific HEA funded institutions. In a small number of instances clients were referred to FÁS or the County and City Enterprise Boards.

4 OUTPUT INDICATORS

Between the 19th December 2011 and 27th January 2012 a total of 99 completed applications were received in respect of EGF Training Grants (83) and Reimbursement of Fees Paid (16).

Table 4.1
Status of EGF Training Grant Applications on 27-01-2012

	FETAC	HETAC	Reimbursement	Total
Being Processed	44	0	10	54
Approved / Awarded	38	1	6	45
Total Received	82	1	16	99

The figures presented in Table 4.1 show that, with one exception, all of the completed EGF Training Grant Applications were for FETAC approved courses. Almost half (38 corresponding to 46.3% of completed FETAC applications) of the EGF Training Grant Applications (FETAC) were approved by the 27th January 2012.

Sixteen applications for Reimbursement of Fees Paid were received by the EGF Construction Contact Centre during the reference period for this report. Six of these have been approved.

Table 4.2
Status of Eligible Cohort by NACE 2 on 27-01-2012

	NACE 41	NACE 43	NACE 71	Total
General Enquiry – No Uptake	90	52	15	157
Being Processed / Case Managed	74	52	20	146
Awaiting VEC Guidance	58	22	11	91
Course Completed	3	2	0	5
Course Started	10	5	4	19
Enrolled on Course	7	5	2	14
Other	8	12	0	20
Total	250	150	52	452
% of Eligible in Cohort in Programme	5.6	4.6	6.4	5.1

Data on the status of the 452 EGF eligible individuals who accessed the services of the EGF Construction Contact Centre show that 275 (corresponding to 60.1% of all EGF eligible persons contacting the EGF Construction Contact Centre) had accessed (38) or were accessing (237) specific interventions on the 27th January 2012. Many of the individuals in the latter category are expected to commence specific EGF supported interventions in February 2012.

Table 4.2 shows the main outputs achieved during the reference period by NACE 2 sector. In overall terms, 38 persons had completed (5), started (19), or were enrolled (14) in specific courses. A total of 91 persons were waiting to participate in VEC guidance courses and a further 146 persons were being case managed by the EGF Construction Contact Centre.

Persons allocated to the *General Enquiry - No Uptake* and *Other* categories are considered to be unlikely to avail of EGF supported interventions.

5 CONCLUSION

The period covered by this implementation report is just six weeks. Allowing for the annual holiday period, approximately four weeks of full implementation are covered. During that time 452 EGF eligible individuals (corresponding to 5.1% of the EGF eligible cohort) accessed services provided by the EGF Construction Contact Centre and 275 of these had either accessed or were in the process of accessing EGF supported interventions on January 27th 2012. Allowing two to three weeks for the processing of applications and supporting individuals to access relevant interventions

suggests that progression to actual uptake of interventions will continue into February 2012.
